01-03-2018 ► 29-02-2020

The content of the present material represents the exclusive responsibility of the authors and the National Agency or the European Commission will not be held responsible for the manner in which the content of the information is used.

Results

- Curricula of the blended-learning mentorship and career guidance training course
- ICT materials for the online blended-learning mentorship and career guidance skills training course

- Mentorship skills and career guidance learning materials and methodology for face to face youth blended-learning training course
- Guidelines for professional peer-coaching

- Best practice collection for gender balance and non-discrimination in career guidance
- Online Platform and pilot the youth blended-learning mentorship and career guidance skills training

Online MENTOR will facilitate employability and transition of young people over 18 from youth to adulthood, increasing their level of job-competences and entrepreneurship skills.

Objectives

01

To create a network of specialized trainers on mentorship

02

To develop professional competences and entrepreneurial skills

03

To enhance tolerance, equality, gender balance, and social cohesion

Target Groups

The direct target groups are nurses, social workers, teachers, youth trainers, youth workers, practice responsables / mentors interested to acquire knowledge, to learn practices and to improve their skills for becoming mentors for young people over 18 at the beginning of their career, students, volunteer
